Rebuild**POTRERO**
FOCUS GROUP MEETING #1

SAFETY RECAP:
Goals and Principles to Create a Safe Potrero

Design well-defined and well-lit common spaces (open space, streets, stairs, sidewalks, unit entries) that are easily supervised by residents of the neighborhood.

Promote a strong sense of community by providing opportunities for people to know and watch out for each other.

Include services and facilities that encourage community gathering and attract people from other parts of the city such as retail, parks, and a community center.

Provide vehicular and pedestrian connections in, out and through the new development that will integrate it with the larger neighborhood and city.
