# NOA EXCEEDANCES - DETAILS

**Date(s):** 8/12 – Crosswind Monitor

**Source:** Elevated NOA readings in the crosswind monitor indicated the source of NOA exceedance to be due to excess material movement in preparation for vertical construction commencement.

**Action:** Increased water suppression was utilized in this area on 8/12 in the vicinity of the crosswind monitor, resulting in lower NOA levels at the crosswind and downwind monitor on subsequent days.
