Note: Rainouts witnessed – 1/20 – Filter overloaded resulting in N/A reading at downwind monitor.

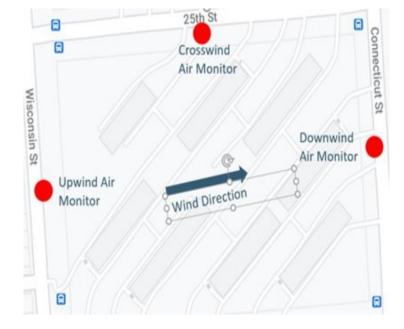

JANUARY 2021 NATURALLY OCCURING ASBESTOS NOA EXCEEDANCES

Date(s): Jan 11 @ Downwind and Crosswind Monitor

Jan 13 @ Crosswind and Extra Downwind Monitor

Jan 17, 19, and 24 @ Extra Downwind Monitor

Jan 31@ Crosswind Monitor

Source Adjacent construction activities on 25th Street unaffiliated with Potrero Phase 2 infrastructure construction.

Action: The external contractor working on the unaffiliated project was immediately notified of how their construction activities were contributing to NOA exceedances and were advised to increase air quality mitigation efforts immediately. Additionally, the Potrero Phase 2 contractor implemented heightened water suppression to all active construction.
