NOA EXCEEDANCES - DETAILS

Date(s): 7/5 – Downwind Monitor
7/7 – Crosswind Monitor

Source: 7/5 - Elevated NOA readings in the downwind monitor indicated the source of NOA exceedance to be due to road grading

7/7 – Elevated NOA readings at the Crosswind monitor resulted from excess earthwork in advance of surface grading.

Action: Increased water suppression was utilized in this area on 7/5 in the vicinity of the downwind monitor and 7/7 in the vicinity of the crossing monitor, resulting in lower NOA levels at the crosswind and downwind monitor on subsequent days.
